

Listening Machines

Voice and music agents that listen, decide, and play along — not just generate sound.

Where this module fits

Four threads from this course converge into one interactive agent - and you build it.

WHAT YOU WILL LEARN

Music information dynamics

modeling what's heard: expectation & surprise

Improvisation engines

Markov & oracle models: responding in style

Accompaniment & alignment

staying in time with a partner

Voice agents

real-time turn-taking, barge-in, full-duplex

converge into

Your hands-on agent

the Sonic Co-Performer

1

Listen to the clip

2

Identify the cue

3

Choose an action

4

Synthesize a response

The crux: drift → repair

don't chase the loud lure - return to the topic
